DETAILED ACTION

1. This is in response to the applicant's argument received 9/20/04, in which claims 1-36 are pending.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Catherine Ashley Straight on November 29, 2004.

The application has been amended as follows:

In claim 1 line 2, "a" has been canceled instead -- said-- has been replaced.

In claim 34 line 2, " a" has been deleted instead --said--has been replaced.

In claim 34, line 11, "means for" has been deleted.

In claim 18 line, 1 "18" has been deleted instead --1--has been replaced

Claims 35-36 have been deleted.

Allowable Subject Matter

2. After a further search and thorough examination of the present application and in view of the applicant's argument, claims 1-34 are found to be in condition for allowance.

Claims 1-34 are allowed over the prior art.

The following is an examiner's statement of reasons for allowance: the closest prior art, Lustila et al (US 6,771,938) teaches a communication terminal handset having

a translucent outer casing and a light source arranged for illumination of a substantial area of the casing (see abstract).

On the other hand , the present application specifically teaches communications device further including a ringing transducer, a power source and a transducer power circuit extending there between, producing a ring tone which varies in frequency, amplitude and duration said transducer power circuit having a portion physically exposed and electrically conductive to provide first and second contact points; substrate; a bus line mounted on said substrate, said bus line including a pair of conductors; at least one light emitting device connected to said pair of conductors; and first and second interconnection leads each respectively connected to one of said pair of conductors, said first and second interconnection leads having a portion extending away from said substrate and having first and second remote end terminals, and said first and second remote end terminals connected respectively to said first and second contact points. These limitations, in conjunctions with all limitations of the independent claims, have not been disclosed , taught or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
